Vulnerable Population Registry

The Vulnerable Population Registration was designed as a joint partnership between all municipalities and Broward County to assist emergency responders to better plan for future recoveries from hurricanes and other disasters. Registering into the database should not be considered as a guarantee that you will be provided services or be placed on a priority list for emergency responders; however, it will help us to be better prepared to respond after a disaster.

After Hurricane Wilma in 2005, many residents that were disabled, frail or had health issues did not evacuate to a shelter and did not have family or friends to assist them during the prolonged power outages in the aftermath of Wilma. Some of these residents experienced serious difficulties. Some were not able to leave their apartments to get assistance because the elevators were not functioning or let anyone know that they were in need because the phones were not working properly.

If you are interested in registering with Broward County for the Vulnerable Population Registry, go to <http://www.broward.org/atrisk/> or call the Broward County Call Center at 954-831-4000.

All the information provided will be held in the strictest confidence as required by State law. Thank you for taking the time to help us serve you better.
